OUR STORY

In 2008, Riddhi Siddhi Bearings Pvt Ltd began its mission to redefine excellence in the bearing industry. Starting operations in Bangalore, we swiftly established ourselves as a trusted provider for high-quality bearings and exceptional service

Over the years, our dedication to delivering top-notch products and unparalleled customer satisfaction has resulted in a loyal clientele, particularly across South India. With sixteen years of industry experience, Riddhi Siddhi Bearings' journey has been marked by continuous growth and achievement.

As we reflect on our journey, we take pride in our accomplishments and look towards continued growth and success in the years to come.

Our unwavering commitment to quality, competitive pricing, and customer-centric service remains the cornerstone of our future endeavors

At Riddhi Siddhi Bearings, our history is a testament to our dedication to excellence. We are excited to collaborate with you and write the next chapter of our story together

INDUSTRY-LEADING

Your one-stop shop, housing the world's best brands under one roof. We're the bearing experts, housing a comprehensive portfolio of the world's most esteemed bearing brands. We cater to the diverse needs of your industry, offering a meticulously curated selection of bearings to optimize the performance of any machine

ROLLWAY®

A REGAL REXNORD BRAND

The Rollway® Brand has been a pioneer in the open ball and roller bearing industry for over 110 years. Over the years, The Rollway® Brand has established itself as a global supplier of high-quality standard and metric bearings to a wide array of OEM and end-user businesses.

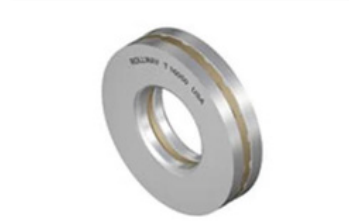

Rollway bearings offer a combination of high load capacity, low friction, long service life, and ease of installation and maintenance that makes them a popular choice for many industrial applications

Featured Product Categories

Cylindrical Radial Roller Bearings

Cylindrical radial roller bearings facilitate ease of mounting and dismounting, particularly where both races are an interference fit on their seating.

Tapered Roller Bearings

Tapered radial roller bearings create a line of contact between the raceway and rolling element distributing loads across a larger area and can accept heavier X & Y load capacities.

Spherical Roller Bearings

Spherical roller bearings create an elliptical shaped contact area that is larger than a ball bearing making them ideal where static and dynamic misalignment is present.

ZKL CZ group is the biggest manufacturer of large-scale spherical-rollers, balls, special and split bearings in Central Europe. Founded in 1921, the ZKL brand from Czech Republic is known for its focus on Quality and Innovation and has established itself as one of the most reputed bearing manufacturers. ZKL has left a footprint all across the globe. ZKL caters to all the major industrial segments, ranging from railways, mining, cement, steel, paper etc. making India one of the biggest markets for the company.

Established in Brno, Czech Republic in 2008, New Force offers high-precision bearings featuring optimized geometry for superior rigidity and durability. Made from chrome steel, these bearings are ideal for demanding applications in automotive, construction, railway, steel mill, and wind power industries.

SYN Bearings, a trusted name in the industry since 1985. They've earned a reputation for exceeding customer expectations by providing a vast selection of high-quality bearings at competitive prices. Their extensive inventory boasts over 150,000 types of bearings, ensuring they have what you need to keep your operations running smoothly.

The group possesses two state-of-the-art factories, thirty two distribution centers spread across the country as well as one R&D center situated in Ahmedabad, all of them supporting our growing presence nationwide.

Industries we cater to

- Textile Machinery
- Steel plants
- Construction Machinery
- Electrical Engineering
- Food Industry
- Conveying equipment
- Industrial Gears
- Mining, Cement & Power Generation
- Agricultural Engineering
- Wind power
- Pulp and Paper

Special & odd sized bearings

- High Temperature Bearings
- High Speed Bearings
- Eccentric Roller Bearings
- Full Complement Bearings
- Hex Bore Bearings
- One Way Bearings
- Sealed Spherical Roller Bearings
- Stainless Steel Bearings
- Teflon Bearings
- Ball Transfer Units
- Combined Bearings
